### PATIENT SOLUTIONS, COMMERCIAL SUCCESS

**Innovative solutions for patient access,  
affordability and adherence**

Omnicare Specialty Care Group (SCG) provides integrated services starting with the manufacturer and continuing through to the patient. We provide reimbursement assistance, financial solutions, compliance and adherence programs, managed samples and specialty pharmacy services to accelerate and maximize commercial uptake. Our synergistic platforms also incorporate third party logistics services. A single management team leads the development and execution of custom programs across our organizational platforms, allowing coordination of resources and assets to support positive outcomes for patients.

Since many different obstacles may exist in initiating and maintaining therapy, our team designs product-specific solutions that improve access and increase speed to therapy, solve for affordability issues and support compliance and adherence.

#### **Access: Strategic Reimbursement Support**

Omnicare SCG's programs are tailored to meet the specific needs of our clients and their products. Our staff is highly skilled in payer coverage, coding, reimbursement assistance, appeals and prior authorization support, and product distribution. We are committed to collaborating with patients and providers to secure product coverage that is timely and accurate. Through our reimbursement support programs, we assist thousands of patients in gaining access to paid therapy each year.

#### **Affordability: Copay Programs, Foundations and Patient Assistance Programs**

We're committed to ensuring that all patients can afford their medications. Omnicare SCG offers a wide range of financial assistance tools, including copay assistance, foun-

dation support, and patient assistance programs (PAPs), including free drug qualification and distribution. Our affordable solutions are customized to meet the unique needs of the disease category and patients.

#### **Adherence: Patient Engagement**

Omnicare SCG has extensive experience working with manufacturers to implement and manage innovative programs focused on patient adherence and persistency to ultimately improve overall therapy goals. Our clinical team performs a complete evaluation of each product and disease class and works within manufacturer-suggested guidelines to create a customized adherence program specific to each therapy. Additionally, Omnicare SCG assists with initiation of therapy for products requiring nurse injection training.
